Subject: Support of proposal #11

October 12, 2006

To Whom It May Concern:

I support proposal #11 - Housatonic Fisheries Assessment, submitted by Massachusetts Division of Fisheries and Wildlife.

As someone that has family and friends who are avid fisherman in the Berkshires on the Housatonic River, I feel that it is imperative that something is done to compensate for our loss of resources relative to pollution of the Housatonic River by performing research and creating programs to support the fish and their habitat.

Sincerely,
Kevin Williams
