Subject: Improving the Housatonic

To Whom It May Concern:

I support the proposal #11 - Housatonic Fisheries Assessment, submitted by Massachusetts Division of Fisheries and Wildlife.

As an avid fisherman who is interested in recreation and conservation, I feel that it is imperative that something is done to compensate for our loss of resources relative to pollution of the Housatonic River by performing research and creating programs to support the fish and their habitat.

Please consider my stance on this issue. Me and many more like me are very much in support of any effort towards creating a better, cleaner, healthier Housatonic.

Sincerely,
Melissa Lillie
