Re: Project Native

To whom it may concern:

This letter is to encourage your consideration of support for Project Native and their participation in the Housatonic River Floodplain Forest Restoration Project.

Project Native has become, in a very short time, an important resource in the Berkshires for native plants and trees. I have been working with them to diversify the ecology of my property and make it more hospitable for the native animals, birds, and beneficial insects, as well as beautiful for the benefit of the community that I live in.

They have an extraordinary knowledge base and desire to work with individuals, as well as groups, to create an environment that is sustainable and enjoyable for us all.

I hope that you will fund this project and include Project Native as an integral part of it.

Best regards,

KRISTIN HATT
