Natural Resource Damages Assessment Grant

Dear Review Team Grants Allocation,

We, as a private Landscape Architectural firm, wish to give the heartiest endorsement for the unique and most needed work of Project Native.

As a young organization they have exhibited more initiative and assertive persistence than many organizations much more established. Their potential to serve the citizens, professionals and the all important environment of our region is unlimited. We give them high marks for their value centered work that often borders on the inspirational.

They deserve very careful review and the encouragement such a grant would give them.

Sincerely

Walter Cudnohufsky
